SUMMARY

A passionate web developer focused on creating high-quality, user-friendly digital experiences, seeking opportunities to contribute technical skills and innovative solutions in a professional environment.

PROJECTS

Schedular

github.com/Uday-264/schedular

· Developed a scheduling application with a secure, full-stack architecture, enabling users to manage their personalized timelines and appointments efficiently.
· Integrated Clerk Auth for secure user authentication, enhancing data security and user experience.
· Used PostgreSQL and Prisma ORM for database management, ensuring scalable and efficient handling of scheduling data.
· Incorporated real-time updates using Socket.io, boosting interactivity and responsiveness within the application.
· Deployed the application using Docker for consistent environments, ease of deployment, and scalability.

Discord clone

github.com/uday-264/discord-clone

· Developed a Discord clone with real-time chat, voice channels, and screen sharing, offering seamless communication and collaboration through servers and channels.
· Built the front-end using Next.js and TailwindCSS, ensuring a responsive and modern user interface styled with Shadcn components.
· Employed PostgreSQL with Prisma ORM for managing and storing user, server, and channel data effectively.
· Integrated Clerk Auth for secure and scalable user authentication, enhancing the app's security and user experience.
· Utilized Zustand for state management and Socket.io for real-time communication features like chat and voice, providing a dynamic and interactive user experience.

EDUCATION

Bachelor Of Technology In Computer Science Engineering

Vaagdevi College Of Engineering · Warangal,telangana · 2022 · 7.3

SKILLS

Programming: Javascript, Typescript, Python, Java, HTML, CSS

Frameworks:Nextjs, Expressjs

Libraries: React, Nodejs,Socketio,Shadcn

Tools:Docker, Git, Github, Vscode

ORM: Prisma, Mongoose

Databases: PostgresSQL, MongoDB
